## TRUCKING INFORMATION

Transporting a large boat is a tricky operation. Boats must be properly prepped for trucking. Rigging or canvas that is not properly secured can do extensive damage to a boat when it is traveling down a highway at 70 miles per hour. Crowley's strongly recommends that you use a trucking company that specializes in boat transport. Also, that you work directly with the trucking company rather than with a trucking broker. Make be sure you have insurance that covers the boat during transport and that the trucking company is also properly insured.
